MONDAY MORNING, FEEBUARY 18, 1861. THE SIGN-LANGUAGE OF THE AMERICAN

INDIANS. The English journals praise Mr. J. G. Kuhl's new book of American travel, "Kitchi-Gami, or, Wanderings Round Lake Superior." Readers who have not already perused Mr. Kohl's agreeable pages, will be interested in his description of the sign-languages now in common use among the abor-

igines of America: "When speaking, for instance, of the Great Spirit, they usually direct a reverential or timid glance upwards, or point the fore- mediately. finger perpendicularly but gently to the sky.

. When alluding to the sun or to the time which is much the same thing, as the sun is their clock, and indicating the spot at which the sun stood when the event to which they are alluding occurred, they point fixedly to that point, and hold their arm in that posi-

tion for several moments. finger slowly along the entire vault of heaven commencing at the east and terminating in the West. This is the sign for 'one-day.' "If a shot has to be mentioned in the story they usually strike the palm of the left with

a slight sound. "If describing a journey on horseback, the two first fingers of the right are placed astride of the fore-finger of the left hand, and both represent the gulloping movements of a horse. If it is a foot journey, they waive the two fingers several times through the air. "In counting, the ten fingers are naturally used and the number is not only held up,

but mentioned. "In this manner, and by many hundred similar gestures, they supplement and support their oral remarks. And it will be seen, from the gestures I have described, that the tongue can be frequently allowed a rest, and the meaning perfectly conveyed

by the signs. "Suppose an Indian wished to tell another that he had ridden for three days over the prairie, he first points to his own worthy person; that will indicate 'I.' Then he sets his fingers a galloping as I have described. This perfects the idea: 'I travelled on horseback.' Next he passes his hand once athwart the sky which furnishes the notion of the 'day;' and finally holds up three fingers before his friend's eyes to show that he spent three days.

"It is a curious fact, that though Indian dialects differ so greatly this language, of signs is the same for enormous distances. All tra- with any manufactured, either in or out of the vellers who have crossed the prairies told me | State of Virginia. that there was only one sign-language, which all the Indians comprehended, and any one who had learned it could travel with it from one end of America to the other.

"For such signs as those of which I have given specimens, such as the sun, a day, a ter or more natural could be chosen, this is easily to be understood. But the sign-language developed itself to a fuller extent, and undertook a visible representation of abstract ideas. Hence much must naturally become conventional. Thus for instance, if desirous to express the idea of 'beauty,' this could not be imitated like the explosion of a gun. Still, some sign to express this the Indian races were unanimous in accepplain that they saw a beautiful woman, they pass the flat hand gently and slowly through the air, as if imitating the waveline. Even the sex is described unanimously. When speaking of a woman the Indians pass | patronise this house. the palm once down the face and the whole body, as if wishing to indicate the long waving dresses or the graceful contour of the female body. This smoothing of the face uni-

"A copious grammar of this language of signs could be written. How rich it would be may be drawn from the fact that Indians of two different tribes, who do not understand a word of each other's spoken language, will | sit for half a day on one spot, talking and chattering, and telling each other all sorts of stories with movements of their fingers, heads | ing had considerable experience in the business,

versally means a member of the fair sex.

"A hollow hand, with the motion of drawing water, signifies water. When the finger traces serpentine lines on the ground it is a and Pleasant Rooms, guarantied to all. A share river. A hand moved up and down in the of the patronage of the travelling public is solic-

air signifies a mountain. "The several beasts have naturally their special signs. Usually only some characteristic portion of the animal is imitatedfor instance, the horns. The horns of the buffalo differ from those of the elk, and thus the entire animal is indicated.

"The idea of a large number or 'many,' is described by clutching at the air several times with both hands. The motion greatly resembles that of danseuses playing the castagnettes.

"Little,' or 'nothing', is signified by passing one hand over the other. "Very curious, but quite universal, is the

sign for admiration among the American Indians. They hold the hollow hand for some time before the mouth. This is, however, I to furnish the suspect, a species of quid pro quo, and the real sign-namely, the mouth widely opened in amazement-is concealed behind it. They carry the hand to the mouth and conceal the face behind it because it is improper to display emotion or admiration.'

SKATING COSTUME FOR NEW YORK LADIES. -The latest style of dress worn by New York lady skaters is described as the Polish costume, with short blue skirts, fur trimmed | French Porcelain TEA SETTS, white, white and basques and hats, and tight fitting ankle boots, trimmed also with fur. Others have English White Granite TEA SETTS and PIECES, a semi-Zouave costume, with a short skirt of a bright red, and pantalets of the same ruddy hue, fastened tightly around the ankle, (the basque and hat both trimmed with fur) considered picturesque and comfortable.
